INDEX OF VOLUME 6

Agnew, R. P. *Permutations preserving convergence of series*, 563.

Anderson, F. W. *A lattice characterization of completely regular G_δ-spaces*, 757.

Anderson, R. D., and Hamstrom, M. E. *On spaces filled up by continuous collections of atriodic continuous curves*, 766.

Anderson, T. W. *The integral of a symmetric unimodal function over a symmetric convex set and some probability inequalities*, 170.

Arsove, M. G. *The Looman-Menchoff theorem and some subharmonic function analogues*, 94.

Artzy, R. *On loops with a special property*, 448.

Austin, D. G. *An isomorphism theorem for finitely additive measures*, 205.

Baer, R. *Supersoluble groups*, 16.

Bahadur, R. R. *Measurable subspaces and subalgebras*, 565.

Balachandran, V. K. *On complete lattices and a problem of Birkhoff and Frink*, 548.

Barrett, J. H. *Behavior of solutions of second order self-adjoint differential equations*, 247.

Bartle, R. G. *Newton's method in Banach spaces*, 827.

Baxter, G. *An analogue of the law of the iterated logarithm*, 177.

Bell, P. O. *Generalized theorems of Desargues for n-dimensional projective space*, 675.

Bellman, R. *On an iterative procedure for obtaining the Perron root of a positive matrix*, 719.

Berman, G. *A three parameter family of partially balanced incomplete block designs with two associate classes*, 490.

Bing, K. *On arithmetical classes not closed under direct union*, 836.

Bing, R. H. *Partially continuous decompositions*, 124.

Blair, A. *Continuity of multiplication in operator algebras*, 209.

—— See Warner, S.

Blair, R. L. *A note on f-regularity in rings*, 511.

Blum, J. R. *A note on estimating distribution functions*, 953.

Blumenthal, L. M., and Klee, V. L. *On metric independence and linear independence*, 732.

Boas, R. P., Jr. *Moments of analytic functions*, 412.

Briggs, W. E. See Chowla, S.

Bruck, R. H. *Analogues of the ring of rational integers*, 50.

Buck, R. C. *On n-point expansions of entire functions*, 793.

Burgess, C. E. *Certain types of homogeneous continua*, 348.

Calloway, J. M. *On the discriminant of arbitrary algebraic number fields*, 482.

Carlitz, L. *A special determinant*, 270.

Carlitz, L., and Olson, F. R. *Maillet's determinant*, 265.

Chen, Y. W. *Degenerate solutions of partial differential equations*, 855.

Chern, S. S. *An elementary proof of the existence of isothermal parameters on a surface*, 771.

—— *On special W-surfaces*, 783.

Chowla, S., and Briggs, W. E. *On the number of positive integers $\leq x$ all of whose prime factors are $\leq y$*, 558.

Cohn, R. M. *Finitely generated extensions of difference fields*, 3.

—— *On the intersections of the components of a difference polynomial*, 42.

Collins, H. S. *Completeness, full completeness, and k spaces*, 832.
